## **Part I - The TJ-SIF 2019**

**T**hailand - **J**apan Student ICT Fair 2019 at Princess Chulabhorn Science High School Mukdahan brought together by Thai and Japanese high school students, school executives as well as science and ICT teachers. It is the second ICT projects in Information and Communication Technology event which allows Thai and Japanese students to orally present their own ICT projects in five areas: IoT Application, Robotics, Automotive, Software and Smart Electronic as well as make a poster presentation.

Furthermore, the students attend a wide-range of well-designed activities to help extend their knowledge and improve their scientific skills. The event broadened their learning horizons and sustained their scientific and technological interest. Above all, Thai and Japanese students spent some time together for over three days will create lasting friendship amongst new generations of both countries.

## **Background Information**

**T**hailand - **J**apan Student ICT Fair 2019 will be held on December 20-22, 2019 at Princess Chulabhorn Science High School Mukdahan. It is jointly organized by all Princess Chulabhorn Science High Schools and has the following objectives:

1. To enhance the scientific mind and competencies of the participants.
2. To develop good interpersonal and communication skills of the participants.
3. To broaden the participants' global outlook.
4. To form friendships among Thai and Japanese participants, which will contribute to cooperative learning and joint projects as well as future collaboration.
5. To strengthen academic collaboration between Princess Chulabhorn Science High Schools and their Japanese Super Science High School partners.
6. To establish friendship and cooperation between Princess Chulabhorn Science High Schools, Super Science High Schools, National Institute of Technology (Kosen) with special program in ICT both in Thailand and Japan.

*"The pearl on the bank of the Mekong, sweet tamarind, origin of Phaya River, splendid mountains, valuable ancient drums, eight-tribe cultures, picturesque Manorom Mount, and beautiful Kra Bao Islet"*

## Princess Chulabhorn Science High School Mukdahan

Mukdahan is the 73rd province of Thailand with the population of approx. 346,000 people. It is located approx. 642 km from Bangkok. Its history dates from the late Ayutthaya period, over 200 years ago. At first, on the left side of the Mekong River, there was a large community called Ban Luang Phon Sin located by Phrathat Ing Hang, presently in Savannakhet Province of Lao PDR. The community was ruled by Chao Chan Suriyawong. His son was Chao Kinnari. He later built a new town at the mouth of Huai Muk on the right bank of the Mekong River in 1767. The town was completed in 1770 and named "Mukdahan" (moonstone or pearl) according to a propitious sign occurring to him while the town was under construction. That is why the locals call the town "Mueang Muk".

## Phu Pha Thoep National Park

It is formerly known as Mukdahan National Park, is a national park in Mukdahan Province, Thailand. This park, one of the country's smallest national parks, is home to unusual rock formations and a cave with ancient hand paintings.

## Geography

Phu Pha Thoep National Park is located about 17 kilometres (11 mi) south of Mukdahan in Mueang and Don Tan districts. The park's area is 48.5 square kilometres (20 sq mi). The highest point is Phu Jongsi peak at 420 metres (1,400 ft).

## History

Phu Pha Thoep National Park is home to a cave with hand paintings estimated to be 3,000 to 5,000 years old. The cave name, Tham Fa Mue Daeng, means "red hand", referring to the red colour of the paintings.

## Flora and fauna

The park features forest types including mixed and deciduous. Tree species include Malabar ironwood, Burmese ebony, makha, rosewood, heang (a dipterocarp), tiew (in the Guttiferae family), wild champaka, Moulmein cedar, Siamese sal and ingyin.

Animal species include deer and wild boar. The park's many birds include junglefowl, green peafowl and pheasant. In 2005, specimens of a new frog species, Fejervarya triora, were discovered in the park.

## The Second Thai–Lao Friendship Bridge

Mukdahan Province in Thailand with Savannakhet in Laos. The bridge is 1600 meters (1.0 mi) long and 12 meters (39 ft) wide, with two traffic lanes. Traffic on the bridge drives on the right, as in Laos, while traffic in Thailand drives on the left; the change-over is on the Thai side. Bridge construction began on March 21, 2004. Supports and spans were constructed on shore, then moved out onto pylons in the river by crane. The total cost was about 2.5 billion baht (US\$70 million), funded largely by a Japanese loan. An official opening ceremony was held on December 19, 2006, although the bridge only opened to the general public on January 9, 2007.

## Phu Manorom

Another interesting place is Phu Manorom is situated in Wat Roi Phra Bat Phu Manorom which is located about 5 kilometers from Mukdahan City. Phu Manorom offers a beautiful scenery viewpoint of Mukdahan, the Mekong River, the Second Thai-Lao Friendship Bridge, and Savannakhet Province in Lao. Phu Manorom has had the road up the hill improved, and provided a parking area and viewpoint pavilion.

### Internet Connections

As Free Wi-Fi is available throughout school campus, you don't have to buy an extra internet package. However, if you need it for personal purposes, you can buy a Thai SIM card which is available in any convenience stores and service shops of network providers (AIS, DTAC and True). For your convenience, we highly recommend you buy a Thai SIM card at any of the three network provider shops on the 2th floor of Suvarnabhumi International Airport (right after you pass the customs and walk through the exit) or on the 2nd floor of Don Mueang International Airport (the passage between Terminal 1 and Terminal 2. There are various packages according to each provider.

In case of calling, please make sure that you have applied for the roaming service with your national network provider or you can make an international call with your Thai SIM card. Thailand's calling code is +66 and Japan's calling code is +81. As there are various SIM card packages, please ask for more information on your network provider shops.

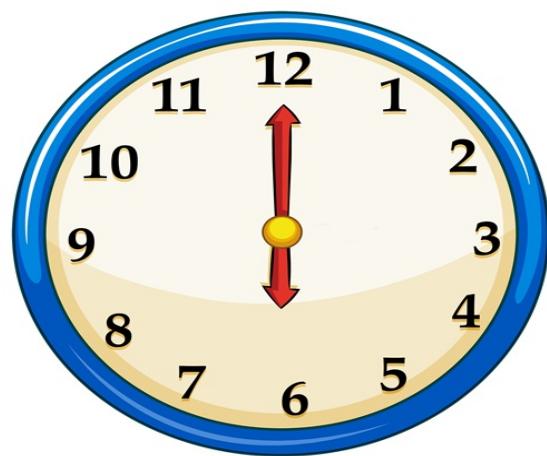

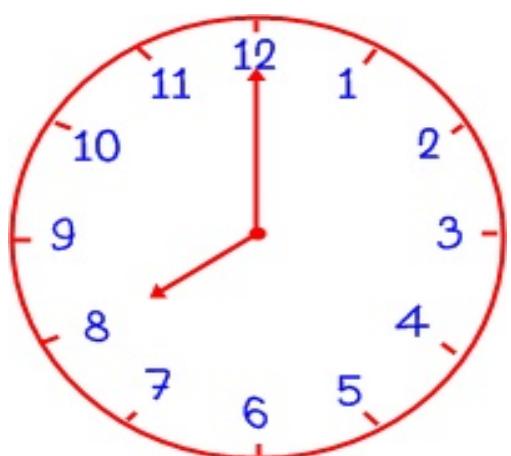

## Electricity

The electricity in Thailand is 220 volts, 50 cycles/Sec. As Japan has different voltage, it is not recommended that you use your 110 volt appliances in Thailand because of the risk of damage. However, if the "100~240V" is labeled on your appliances, it means that your appliances are compatible with the voltage in Thailand. As the sockets in Thailand are as follows, you don't have to use a plug adapter.

## Time Difference

The time in Thailand is seven hours earlier than Greenwich Mean Time. It means two hours behind the time in Japan.

### Climate in Thailand

The weather in Thailand is classified as hot and humid, with a long monsoon season. Thailand has three official seasons - summer, winter, and rainy. The hot season runs from March through to June, with April and May the hottest months of the year.

The weather is fine in early morning and late at night during the month of December and it is a little bit too warm during the day, thus we suggest all the participants to dress comfortably and appropriately, we highly recommend wearing lightweight, short sleeve shirts during daytime. However, we would also like to inform you to appropriately follow dress codes while visiting temples and palaces.
